Subject: J/105 Spinnaker Cloth

This is a follow-up to my e-mail of December 13, 2005.

The rule submission that I referred to in the earlier e-mail was passed unanimously by the Executive Committee. The minimum cloth weight for our spinnakers changes from 42 gsm to 44 gsm for sails delivered on or after February 1, 2006. This means (together with Rule Interpretation RI-05-03) that any cloth with a published specification of less than 44 gsm will not be acceptable for our spinnakers.

A new registration form for 2006 has been posted to reflect this. Please use that for deliveries after 2/1/2006.

Cheers,
Nelson Weiderman
Class Secretary
